

Your Vision

Team development with a difference

How will you rise to the film challenge?

The team event

Working within teams, you get straight into learning the camera and production techniques needed to produce your own films. The focus of the day is very much on fun, with learning drawn out from the shared experience.

The team development day

Understand individual profiles and the structure of high performing teams. Build awareness of yourself and others as you work together to produce your own films. This learning focussed event draws out team roles and work style preferences that can be implemented back at work.

The film challenge

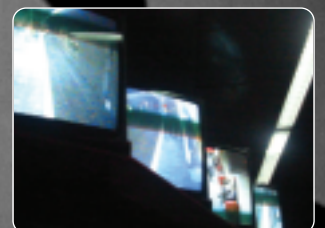

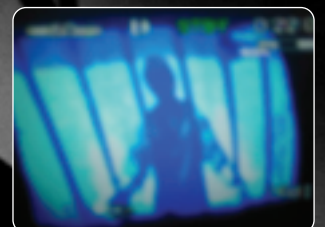

Using full broadcast equipment, the team take on the roles of a full production crew. Working with your individual profiles and work style preferences, the team faces the challenge of scripting, filming, directing, acting, set designing, sound recording and editing. Learning is facilitated through detailed task and team work reviews. You celebrate your success at the end of the event at the Gala Dinner and Awards ceremony.

To find out more on each of these, and to select your team's challenge, contact:
